

CERTIFICAT

OF APPROVAL

No 21

Hereby certifies that:

Bergene Holm AS avd. Skarnes

has received approval to mark preservative treated products of European spruce (*Picea spp.*) in wood preservation class NTR-Gran with the Nordic quality label. This label can only be used on external cladding.

The approval refers to Spruce treated with the preservative Wolsit KD-10 which contains propiconazole as active ingredient. This timber is treated according to NWPC Document No 1, Part 2 and EN 351-1 and quality supervised in accordance with NWPC Document No 3, part 2.

Wood preservation NTR-GRAN imply a treatment in compliance with penetration class NP1 according to NS-EN 351-1. The analytical zone for determining the retention of preservative is the outer zone of 3 mm in accordance with the approval issued by the Nordic Wood Preservation Council (NWPC).

Bergene Holm AS avd. Skarnes has a quality assurance system according to the requirements in NS-EN 351- 1 and NWPC Document No 1 "Nordic wood preservation classes and product requirements for preservative-treated wood Part 2. Spruce (*Picea spp.*).

The production control is supervised by Norwegian Institute of Wood Technology.

This approval is valid until November 4, 2023 but can be withdrawn if the requirements in NWPC Document No 1, Part 2 are not fulfilled.

Oslo, November 4, 2019
